

AI for Professionals

24-Day Practical Training Programme | Adarsha Secondary School, Biratnagar

A simple, hands-on programme for teachers, school staff, working professionals, and beginners.

Programme Overview

Duration	24 days, including 20 teaching days, two presentation days, assessment, and closing
Session Length	4 hours per day, including break
Training Style	Beginner-friendly, demonstration-based, and focused on useful results
Group Project	Prepared during Days 6-10 and presented on Day 11
Individual Project	Built during Days 17-20 and presented on Day 21

Core AI Tools

The programme keeps the tool list focused so participants can learn deeply without feeling overwhelmed.

- ChatGPT, Claude, and Gemini for writing, planning, ideas, teaching materials, and project support.
- Perplexity for source-based research and working with multiple uploaded documents.
- NotebookLM for learning from trusted sources, study guides, summaries, and document questions.
- Google Veo 3 and Flow for simple AI video creation and visual storytelling.

24-Day Syllabus

Week 1: AI Foundations and Everyday Use

Day	Topic	What participants will practise and create	Main AI tools
1	Introduction to AI	Understand what AI can and cannot do. Compare answers from different AI assistants and list useful tasks for work or school.	ChatGPT, Claude, Gemini
2	How to Give Good Instructions	Turn unclear requests into clear prompts. Build a small personal prompt library for daily use.	ChatGPT, Claude, Gemini
3	Choosing the Right AI Assistant	Compare the strengths of ChatGPT, Claude, and Gemini and choose the best one for common tasks.	ChatGPT, Claude, Gemini
4	AI for Daily Productivity	Create a weekly plan, simplify a difficult message, plan an event or trip, and make a useful checklist.	ChatGPT, Gemini
5	Safe and Responsible AI Use	Learn about incorrect answers, privacy, bias, copyright, and fact-checking. Create a simple AI do-and-don't guide.	ChatGPT, Gemini, Perplexity

Week 2: Writing, Research, and Teaching Resources

Day	Topic	What participants will practise and create	Main AI tools
6	Professional Writing with AI	Draft and improve emails, letters, reports, notices, and proposals. Practise formal, friendly, and concise writing.	ChatGPT, Claude, Gemini
7	Perplexity: Learn from Multiple Documents	Upload several documents, ask questions across them, compare information, find key points, and create a source-based summary.	Perplexity
8	NotebookLM for Learning and Research	Upload trusted sources and create summaries, FAQs, study guides, timelines, and an audio overview.	NotebookLM
9	Flashcards and Interactive Quizzes	Turn a chapter or document into flashcards and quizzes. Ask AI to create a simple HTML quiz, open it in a browser, and improve its design.	ChatGPT, Claude, Gemini
10	AI for Teachers and Classrooms	Create a lesson plan, worksheet, marking rubric, classroom activity, and age-appropriate explanation.	ChatGPT, Claude, Gemini, NotebookLM

Day 11: Group Project Presentations

Teams present a practical AI-assisted resource such as a school resource pack, awareness campaign, research brief, or community information kit. Each team explains the tools used, shows the final output, and receives simple peer feedback.

Week 3: Presentations, Visuals, Video, and Useful Content

Day	Topic	What participants will practise and create	Main AI tools
12	Presentations with AI	Plan a clear presentation, create slide content, improve titles, and prepare simple speaker notes.	ChatGPT, Claude, Gemini
13	Images, Posters, and Classroom Visuals	Write strong image prompts and create a poster, classroom visual, or professional graphic.	ChatGPT, Gemini
14	AI Video with Veo 3 and Flow	Write a short script, plan scenes, generate video clips, and arrange them into a simple story.	Google Veo 3, Flow, Gemini
15	Social and School Communication	Create a short content plan, announcements, captions, and a small awareness campaign for a school or organisation.	ChatGPT, Claude, Gemini
16	Understanding Data with AI	Use sample marks, attendance, survey, or expense data to find patterns, write a summary, and suggest a simple chart.	ChatGPT, Claude, Gemini

Week 4: Practical Career and Teacher Projects

Day	Topic	What participants will practise and create	Main AI tools
17	Build a Professional Portfolio with AI	Plan and create a simple portfolio that shows skills, teaching resources, achievements, and selected work.	ChatGPT, Claude, Gemini
18	CV, Cover Letter, and Professional Profile	Improve a CV, write a tailored cover letter, prepare a short professional biography, and practise interview questions.	ChatGPT, Claude, Gemini
19	Build a Useful Teacher or Professional Project	Choose and build one practical project such as a teacher resource pack, subject guide, interactive quiz, research brief, or school communication kit.	Selected core AI tools

20	Project Polish and Peer Review	Check accuracy, improve design and writing, collect peer feedback, and prepare a short presentation of the finished project.	Selected core AI tools
----	---------------------------------------	--	------------------------

Final Days

Day	Topic	What participants will practise and create	Main AI tools
21	Individual Project Presentations	Participants present what they built, how AI helped, and what they checked or improved themselves.	Selected core AI tools
22	Review and Assessment Preparation	Review the main tools and skills, practise common tasks, and ask final questions.	All core AI tools
23	Final Assessment	Complete a short written check, one practical AI task, and a brief reflection on future use.	Selected core AI tools
24	Closing and Certificates	Share selected projects, celebrate progress, discuss next steps, and distribute certificates.	No new tools

Project Options for Days 17-20

- A professional portfolio with a short biography, achievements, and selected work.
- An improved CV, cover letter, professional profile, and interview practice pack.
- A teacher resource pack with lesson plan, worksheet, quiz, rubric, and classroom activity.
- An interactive HTML quiz or flashcard set for students.
- A research or subject guide built from trusted documents using Perplexity or NotebookLM.
- A school communication kit with notices, presentation content, visuals, and a short video.

Simple Assessment Plan

Part	Weight	What is checked
Daily practical work	30%	Participation and useful outputs from teaching days
Group presentation	20%	Teamwork, clarity, and practical use of AI
Individual project	30%	Usefulness, quality, accuracy, and responsible AI use
Final assessment	20%	Understanding and ability to complete a practical task

This training is not about becoming an AI Engineer. It is about becoming an AI-powered teacher, professional, and creator.
