

Proposals and Editable Documents with AI

Today we move beyond simple emails and reports. You will learn how to make AI help you present an idea as a clear proposal, syllabus, contract draft, or MoU that can be edited, shared, exported to DOCX, and saved as PDF.

Proposals

DOCX drafts

PDF-ready output

MoU design

Editable formats

The big skill

Tell AI not only what to write, but how the final document should look, flow, and behave.

● ● ● TODAY'S ROUTE

1. Think document-first

Decide the purpose, reader, sections, and decision you want.

2. Prompt for structure

Ask AI for editable sections, tables, placeholders, and headings.

3. Prompt for design

Use existing colors, fonts, brand style, spacing, and formatting rules.

4. Refine and export

Improve the proposal, then prepare DOCX and PDF-ready versions.

Today is not about fancy vocabulary. It is about making your idea easy to understand, approve, sign, fund, or implement.

Some documents must persuade and organize.

A proposal, syllabus, contract note, or MoU has a job: help another person understand the idea, compare options, agree on responsibilities, and take action.

Proposal

Problem, solution, work plan, timeline, cost, and expected value.

Syllabus

Learning goals, sessions, topics, activities, assessment, and resources.

Contract draft

Parties, scope, deliverables, payment, responsibilities, and terms.

MoU

Shared purpose, roles, commitments, duration, review, and signatures.

Use the AI you have: ChatGPT, Gemini, or Claude.

Different tools may export files differently, but the prompting method is the same: give purpose, audience, structure, design direction, and revision feedback.

ChatGPT

Gemini

Claude

Manual copy to Word or Docs

Other tools can help too

Some tools, such as Canva AI or design assistants, can create proposal layouts. We will still use ChatGPT, Gemini, or Claude to refine the content, improve the logic, rewrite weak sections, and prepare a clean editable draft.

I have a proposal generated by another AI/design tool. Review it for clarity, missing sections, weak reasoning, inconsistent tone, and unclear responsibilities. Suggest improvements before I finalize it.

Do not ask for a PDF first. Build the document in layers.

1

Brief

Explain goal, audience, facts, constraints, and desired decision.

2

Outline

Ask for sections before drafting the whole document.

3

Draft

Generate editable text with headings, tables, and placeholders.

4

Design

Apply colors, spacing, hierarchy, and existing formatting style.

5

Export

Move to Word or Docs, then save as DOCX or PDF.

A strong document prompt has 8 parts.

You are helping me create [DOCUMENT TYPE].
Purpose: [WHY THIS DOCUMENT EXISTS]
Audience: [WHO WILL READ/APPROVE/SIGN IT]
Context: [BACKGROUND FACTS]
Content needed: [SECTIONS, DATA, REQUIREMENTS]
Tone: [FORMAL, SIMPLE, PERSUASIVE, FRIENDLY]
Design: [COLORS, STYLE, BRAND, FORMATTING]
Output format: [EDITABLE OUTLINE, TABLES, DOCX-READY TEXT]
Before finalizing: ask me [NUMBER] questions if information is missing.

Why it works

- AI understands the reader.
- It knows the document type.
- It follows a structure.
- It leaves placeholders instead of inventing facts.
- It prepares text for editing, not just reading.

● ● ● **GENERIC PROPOSAL BLUEPRINT**

Section	What it should do	AI instruction
Title and summary	Make the idea understandable in one minute	Write a clear title and 120-word executive summary
Problem or need	Explain why action is needed now	Use simple evidence and avoid exaggerated claims
Proposed solution	Describe the activity, service, or project	Use headings, bullets, and realistic details
Deliverables	Show exactly what will be produced	Make a table with measurable outputs
Timeline and budget	Help the reader judge feasibility	Use editable tables with placeholders
Benefits and next step	Make approval easy	End with clear decision requested

Generic enough for everyone

This works for training, community work, school programs, NGO projects, services, business offers, partnerships, and internal office proposals.

Use this first draft prompt

Create a professional proposal for [PROJECT/IDEA].

Audience: [APPROVER/CLIENT/PARTNER].

Purpose: persuade them to [APPROVE/FUND/PARTNER/SIGN].

Context: [2-5 background facts].

Must include: title, executive summary, problem/need, objectives, proposed activities, deliverables table, timeline table, budget table with placeholders, benefits, risks and mitigation, next steps.

Write in clear professional language. Do not invent facts; use [PLACEHOLDER] where information is missing. Make the output editable in Word or Google Docs.

Follow-up prompt

Review this proposal as a strict but helpful reviewer. Find missing information, weak arguments, unclear responsibilities, unrealistic promises, and sections that need evidence. Then rewrite the proposal to be clearer and more convincing while keeping it generic and editable.

Draft

Review

Rewrite

Tell AI to follow the design you already use.

If your school, company, NGO, or office already has colors, letterhead, fonts, table style, or report formatting, AI should adapt to that style instead of making a random design.

Design reuse prompt

Analyze the style of the attached/sample document first. Reuse its design rules: colors, heading levels, table style, spacing, tone, logo placement, footer style, and section order. Do not change the brand identity. Create the new proposal in the same visual language, with editable text and tables.

Existing colors

Same heading style

Editable tables

Brand consistency

Use precise feedback instead of saying "make it nice."

AI responds better when you describe what should change: hierarchy, spacing, color, table readability, page breaks, and tone.

Colors feel random

Tables are messy

Too much on page one

Brand style changed

Choose a design problem.

Useful design words

- Visual hierarchy
- Consistent headings
- Readable table
- White space
- Brand colors
- Page break before new section

Editable document prompt

Format this as a DOCX-ready document that I can paste into Word or Google Docs.

Use:

- Heading 1 for main sections
- Heading 2 for subsections
- Bullets only where they improve scanning
- Tables for timeline, deliverables, budget, and responsibilities
- [PLACEHOLDER] for missing facts
- Signature blocks where needed

Do not use decorative text that will be hard to edit.

Editable means

- Real headings, not only bold text
- Tables with short cell text
- Plain section labels
- Clear placeholders
- No image-only text
- No locked design that prevents editing

PDF is the final presentation layer.

Ask AI to prepare clean page flow before exporting. The actual PDF may be saved from Word, Google Docs, Canva, or another document editor.

Make this proposal PDF-ready.

Check for:

1. Clear title page or header
2. Executive summary on page 1
3. Page breaks before major sections
4. Tables that fit landscape or portrait pages
5. Short paragraphs and readable bullets
6. Consistent colors and heading levels
7. Final approval/signature section

Give me a page-by-page layout plan before rewriting.

Export habit

1. Edit in DOCX or Google Docs.
2. Check page breaks and tables.
3. Export or download as PDF.
4. Open the PDF and inspect it.
5. Fix the editable file, then export again.

PROJECT

a 2-day digital skills training

AUDIENCE

school management or funding

PURPOSE

approve and support the progra

STYLE

formal and simple

KNOWN FACTS

20 participants, practical sessions, certificate at the end, limited budget, needs a clear timeline and deliverables.

Build proposal prompt

Copy prompt

Your reusable proposal prompt

Create a professional proposal for a 2-day digital skills training.

Audience: school management or funding partner.

Purpose: approve and support the program.

Known facts: 20 participants, practical sessions, certificate at the end, limited budget, needs a clear timeline and deliverables..

Tone and style: formal and simple.

Must include:

1. Title
2. Executive summary
3. Problem or need
4. Objectives
5. Proposed activities
6. Deliverables table
7. Timeline table
8. Budget table with placeholders
9. Benefits and expected outcomes
10. Risks and mitigation
11. Approval or next step

Format it as a DOCX-ready editable document for Word or Google Docs. Use Heading 1 and Heading 2 labels, short paragraphs, clean tables, and [PLACEHOLDER] where facts are missing. After the draft, give a PDF-ready page layout plan and a short checklist of what I must verify before sending.

● ● ● **REFINE THE PROPOSAL**

Reviewer mode

Ask AI to critique the draft from the reader's point of view.

Act as the approver. What would make you hesitate to approve this proposal?

Evidence mode

Ask what facts, numbers, or examples would make the proposal stronger.

List claims that need evidence and suggest what evidence to add.

Design mode

Ask AI to improve layout without changing the message.

Improve section order, table layout, headings, and PDF page flow.

Rule: Always ask AI to explain what it changed. You need to learn from the improvement, not only receive a better file.

DESIGNING AND DEVELOPING A MOU

MoU section	What to include	Reminder
Parties	Names, addresses, contact persons	Use exact legal names later
Purpose	Why both parties are working together	Keep it short and clear
Scope	Activities, deliverables, responsibilities	Avoid vague promises
Duration	Start date, end date, renewal or review	Use placeholders if unknown
Resources	Money, staff, space, equipment, data, materials	Say who provides what
Review and signatures	Reporting, meetings, amendment, signatories	Get qualified/legal review before signing

MoU prompt starter

Draft a simple editable MoU between [PARTY A] and [PARTY B] for [PURPOSE]. Use clear headings, responsibility tables, placeholders for legal details, and a final signature block. Keep the language professional but easy to understand. Mark anything that needs legal or management review.

PARTY A

Organization A

PARTY B

Organization B

PURPOSE

collaborating on a training prog

DURATION

six months

RESPONSIBILITIES

Party A provides venue and participants. Party B provides trainers, learning materials, and completion report.

Build MoU prompt

Copy prompt

Your editable MoU prompt

Draft a simple editable Memorandum of Understanding (MoU) between Organization A and Organization B.

Purpose: collaborating on a training program.

Duration: six months.

Known responsibilities: Party A provides venue and participants. Party B provides trainers, learning materials, and completion report..

Use clear professional language and include:

1. Title
2. Parties
3. Background and purpose
4. Scope of collaboration
5. Responsibilities table for each party
6. Resources or support to be provided
7. Communication and reporting
8. Duration, review, and amendment
9. Confidentiality or data handling placeholder if needed
10. Termination or withdrawal clause placeholder
11. Signature blocks

Keep it DOCX-ready and editable. Do not invent legal details; use [PLACEHOLDER] where information is missing. Mark items that require management or legal review before signing. Also provide a PDF-ready layout plan with page breaks and table suggestions.

● ● ● BEFORE SENDING ANY DOCUMENT

Use the DOCUMENT checklist.

D

Decision

Is the requested decision or action clear?

O

Ownership

Are responsibilities and names clear?

C

Consistency

Do colors, headings, tables, and terms match?

U

Unknowns

Are missing facts marked as placeholders?

M

Medium

Is DOCX for editing and PDF for final sharing?

Your idea deserves a document that makes it easy to say yes.

Use AI to draft, organize, review, and format. Keep the file editable while improving it. Use existing design and colors when available. Export to PDF only after checking the final layout.

Celebrate

Print / Save PDF

Practice task

1. Create one proposal or MoU prompt using today's builder.
2. Run it in ChatGPT, Gemini, or Claude.
3. Ask AI to review and improve the draft.
4. Prepare it as DOCX-ready text and PDF-ready layout.
