

Create a portfolio people can trust.

Today we turn public-safe personal details, a clear style choice, and AI website builders into a polished portfolio that can be published and shared.

Personal brand

Portfolio website

AI builders

GitHub

Public-ready output

Final output

A portfolio website draft, a GitHub repository, and a shareable link or deployment plan.

● ● ● **STEPS TO CREATE A STRONG PORTFOLIO**

1. Prepare public details

Collect your name, role, short bio, skills, projects, contact method, and any other information that can safely be public.

2. Choose the website style

Decide the feel before building: minimal, bold, creative, academic, startup, developer, designer, or professional service.

3. Build with AI tools

Use Lovable, Bolt, v0, Figma Make, or another builder to create the site nicely, then push the slides and website files to GitHub.

Simple rule: the best portfolio is specific, honest, easy to scan, and safe to share.

Safe to make public

1. Name you want to use professionally.
2. Role or learning focus.
3. Short public bio.
4. Skills and tools.
5. Projects you are proud of.
6. Public email or contact form.
7. LinkedIn, GitHub, or portfolio links.

Keep private

1. Home address and exact daily routine.
2. Phone number unless intentionally public.
3. Private school, office, or client details.
4. Personal IDs, documents, and passwords.
5. Photos or names of others without consent.
6. Anything you would not want searchable later.

Public means searchable

● ● ● **PORTFOLIO CONTENT PACK**

Section	What to prepare	Quality check
Hero	Name, role, one-line promise	Clear in 5 seconds
About	Short story, interests, strengths	Specific, not generic
Skills	Tools, methods, subjects, languages	Grouped by use
Projects	3-6 projects with outcome and proof	Includes your role
Contact	Email, form, or professional link	Safe and working

Bring text before opening a builder

No fake achievements

● ● ● STEP 2 | CHOOSE A WEBSITE STYLE

Minimal professional

Quiet colors, strong typography, lots of whitespace. Best for resumes, consulting, and academic profiles.

Creative showcase

Expressive layout, project visuals, personality, and visual experiments. Best for design, media, and creative work.

Developer portfolio

Project cards, GitHub links, technical stack, demos, and problem-solution-results structure.

Startup builder

Sharp hero, product-thinking language, proof, metrics, testimonials, and call to action.

Student portfolio

Learning journey, class projects, skills in progress, certificates, and reflection.

Service portfolio

Offer, process, past work, pricing signal, trust markers, and inquiry form.

Style should match audience, not just personal taste

Slide 5

● ● ● AI PROMPT | PORTFOLIO STYLE BRIEF

COPY-READY STYLE PROMPT Act as a portfolio website designer.

Audience:

[WHO SHOULD VISIT THIS PORTFOLIO]

Personal brand:

[3 WORDS: e.g., practical, curious, reliable]

Portfolio goal:

[JOB, CLIENTS, INTERNSHIP, UNIVERSITY, FREELANCE, PERSONAL BRAND]

Content I have:

[LIST SECTIONS AND PROJECTS]

Suggest 3 website style directions. For each, include:

1. Visual mood.
2. Color palette.
3. Font style.
4. Homepage layout.
5. Project card style.
6. What to avoid.
7. Which style fits my goal best and why.

Keep the suggestions realistic for a beginner using an AI website builder.

Use before building

1. Pick audience first.
2. Choose one style direction.
3. Do not mix every idea.
4. Save the chosen palette and layout.
5. Use the same style across pages.

Copy style prompt

● ● ● **STEP 3 | BUILD WITH AI WEBSITE TOOLS**

Lovable

Good for turning app or website ideas into editable web projects from prompts.

Bolt

Useful for generating and editing web apps in a browser-based coding workspace.

v0

Strong for generating polished UI components and page layouts from prompts.

Figma Make

Useful when you want to explore visual layout and design direction with AI-assisted design.

Tool choice is flexible. The important workflow is: prompt clearly, inspect carefully, edit honestly, and publish responsibly.

● ● ● AI BUILDER PROMPT | FIRST PORTFOLIO DRAFT

COPY-READY WEBSITE PROMPT Create a polished personal portfolio website for:

Name:
[PUBLIC NAME]

Role or focus:
[ROLE / FIELD / LEARNING FOCUS]

Audience:
[EMPLOYERS / CLIENTS / TEACHERS / COLLABORATORS]

Style:
[MINIMAL / CREATIVE / DEVELOPER / STUDENT / SERVICE]

Sections:

- Hero with name, role, and one-line value statement.
- About section with short public bio.
- Skills section grouped clearly.
- Projects section with 3 project cards.
- Contact section with safe contact method.

Projects:
[PASTE PROJECT TITLES + 1-2 LINE DESCRIPTIONS]

Requirements:

- Make it responsive for mobile and desktop.
- Use clear headings and readable text.
- Keep the design clean and professional.
- Do not invent achievements, employers, awards, or metrics.
- Use placeholder images only if I have not provided public-safe images.
- Include obvious calls to action: View Projects and Contact Me.

Paste into a builder

1. Replace every bracket.
2. Generate the first version.
3. Read every word.
4. Remove invented claims.
5. Ask for focused improvements.

Copy builder prompt

Name

About Projects Contact

Hero: role + value

Short intro, strong call to action, optional professional image.

Recommended order

1. Hero: who you are and what you do.
2. Proof: projects, work, or learning evidence.
3. About: short context and strengths.
4. Skills: grouped tools and abilities.
5. Contact: clear next step.

Do not hide projects too low

Project card formula

1. Project name.
2. Problem or goal.
3. Your role.
4. Tools used.
5. What changed or what you learned.
6. Link to demo, code, document, or screenshot.

PROJECT CARD PROMPT Turn these rough project notes into portfolio project cards.

Notes:
[PASTE NOTES]

For each project, write:

- Short project title.
- One-sentence problem or goal.
- My role.
- Tools used.
- Result or learning outcome.
- One honest limitation or next improvement.

Do not exaggerate, invent metrics, or claim I did work that I did not do.

 PROMPT AGAIN | IMPROVE THE FIRST DRAFT

Clarity pass

Make the hero, headings, navigation, and calls to action understandable in five seconds.

Trust pass

Remove exaggerated claims, add evidence, and make project descriptions specific.

Design pass

Align spacing, color, typography, project cards, and mobile layout.

REVISION PROMPT Review this portfolio draft for clarity, trust, and professional polish. Keep the same overall style, but improve the hero section, section order, project cards, mobile readability, and contact call to action. Remove any generic or invented claims. Return a revised version and list the exact changes made.

● ● ● **PORTFOLIO QUALITY CHECKLIST**

Public safety

No private addresses, phone numbers, confidential work, or unapproved photos.

Truthfulness

No invented employers, awards, client names, results, or fake testimonials.

Readable design

Strong contrast, clear headings, readable body text, and comfortable spacing.

Mobile ready

Navigation, project cards, buttons, and forms work on a small screen.

Working links

GitHub, LinkedIn, demos, contact links, and downloads open correctly.

Fast scan

A visitor understands who you are, what you do, and what to click next.

 PUSH THE WORK TO GITHUB

Use GitHub as the portfolio's public home and version history.

1

Create repo

Name it clearly.

2

Add files

HTML, CSS, assets.

3

Commit

Save a version.

4

Push

Upload to GitHub.

5

Enable pages

Publish site.

6

Test link

Open on phone.

7

Share

Use in resume.

OPTIONAL COMMAND-LINE GIT FLOW

```
COMMANDS git init
git add .
git commit -m "Add portfolio website"
git branch -M main
git remote add origin https://github.com/USERNAME/REPO.git
git push -u origin main
```

Before running commands

1. Replace USERNAME and REPO.
2. Check you are in the correct folder.
3. Do not commit private files.
4. Preview the site locally.
5. Confirm GitHub shows the files.

Never commit passwords or secrets

Reviewer tasks

1. Open the portfolio on desktop.
2. Open it on a phone or narrow screen.
3. Say what the person does in one sentence.
4. Click every important link.
5. Find one unclear claim.
6. Suggest one improvement.

Creator listens for

1. What did they notice first?
2. Where did they get confused?
3. Which project felt strongest?
4. What seemed generic?
5. What should be fixed before sharing?

Time: 10 minutes

Required components

1. Hero with name and role.
2. Public-safe about section.
3. Skill groups.
4. At least 3 project cards.
5. Safe contact method.
6. Responsive layout.
7. GitHub repository or export folder.

Time: 75 minutes

Showcase in 60 seconds

1. Who is your portfolio for?
2. Which style did you choose?
3. Which project proves your skill best?
4. What did AI help build?
5. What did you manually check or fix?

 FACILITATOR VIEW | DAY 17 SCHEDULE

Time	Block	Visible output
00:00-00:25	Portfolio purpose, examples, and privacy rules	Public-safe detail list
00:25-00:50	Style selection and AI style brief	Chosen visual direction
00:50-01:20	Content pack: bio, skills, projects, contact	Portfolio content draft
01:20-01:30	Break	Reset
01:30-02:25	Build first website with AI tool	First portfolio draft
02:25-02:55	Improve clarity, trust, design, and mobile layout	Revised portfolio
02:55-03:05	Break	Reset
03:05-03:35	GitHub push, Pages/deployment, and link testing	Repository or live link
03:35-04:00	Peer review, fixes, and showcase	Publish-ready draft

Your portfolio is your public proof. Make it clear, honest, and easy to share.
